

Sustainable Produce Container

Patent No. USD951,083

100%
Recyclable!

"I'll pay extra for this packaging!"

"Thank you for doing this!"

"I hope you replace ALL the clamshells here, I'm sick of all this plastic!"

actual Kroger in-store customer comments

Consumers are fed up with containers they can't recycle and tired of billions of those plastic clamshells ending up in landfills each year. But from mushrooms to microgreens, and berries to cherries, the Sustainable Produce Container meets this demand for better packaging!

● Product Advantages

- + 100% recyclable, biodegradable, food-safe paperboard (Kraft version is also certified compostable)
- + PFAS-free and compliant with emerging EPR and retailer packaging requirements
- + Competitively priced with plastic clamshells and shipped flat to reduce freight & warehouse costs
- + SPCs stack higher than clamshells or punnets, have secure anchor lock or tamper proof glue dots
- + Eliminate UV labels and extend marketing reach by stamping or custom color printing

● Performance & Design

- + Earth-themed vents deliver excellent airflow and product visibility
- + Reversible Kraft brown/white option offers high wet strength for temperature transitions
- + Hand-form SPCs or buy/lease affordable fixtures, robots, or high-speed folding machines
- + Sizes: Half Pint, Square Pint, Low-Profile Pint, 1.5 Tall Pint, Quart, 1.5 Tall Quart, 2 Quart, 3 Quart
- + Recyclable Master Tray holds all SPC sizes, Small Master Tray available for smaller sizes
